### DETAILED ACTION

A first election/restriction was mailed out 11/19/03 requiring a restriction for claims 1-155. However, it has come to the attention of the examiner that a preliminary amendment filed with the application papers on 01/07/02 instructed the office to cancel claims 1-97, 110-141, & 150-155, thereby leaving only claims 98-109, 142-47 & 149 pending. In response to the first election, applicant submitted an election on 12/15/03 electing claims 96 and 97 which were among the cancelled claims in the preliminary amendment. Since the first election/restriction requirement was for all of the originally filed claims 1-155, it has been withdrawn and a new, proper election/restriction has been set forth for the pending claims, **98-109 & 142-149**.

The new, proper election/restriction below supercedes the first election/restriction requirement.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims **98-109 & 149**, drawn to a flow management system, classified in class 604, subclass 4.01.
- II. Claims **142-148**, drawn to a fluid balancing system, classified in class 210, subclass 252.

The inventions are distinct, each from the other because of the following reasons:

Inventions **I & II** are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of

Art Unit: 3762

operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

With respect to invention I, the invention is different from invention II since they are not usable together and have different effects. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

If applicant chooses to elect the invention of **Group I**, a further election of species is required.

This application contains claims directed to the following patentably distinct species of the claimed invention:

**Species A:** First and second sheets defining first and second compartments in overlapping alignment, first and second fluid pathways defining first and second compartments in overlapping alignment and defining a gap;

**Species B:** First and second sheets defining first and second compartments in overlapping alignment, first and second fluid pathways defining first and second compartments in overlapping alignment and defining a gap; a first and second pump; a first valve; and having pump and valve operation in synchronization.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is considered to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
